EDUCATION

Worcester Polytechnic Institute

Worcester, MA

Bachelor's of Science in Computer Science, Master's of Science in Artificial Intelligence

Jan. 2026 – May 2028

Husson University

Bangor, ME

Double major: Bachelor's of Science in Software Development & Computer Information Systems Aug. 2024 – Dec 2025

EXPERIENCE

Student Assistant - Athletics Office

Sept. 2025 – Dec. 2025

Husson University

Bangor, ME

- Designed a full-stack machine learning system that collected and processed player statistics from multiple games and trained models to identify high-potential players
- Developed a centralized scheduling system using Excel, complex formulas and logic to check facility availability and streamline event coordination
- Collaborated with coaches to support recruitment efforts using Front Rush and Slate

Teaching Assistant

Sep. 2025 – Dec. 2025

Husson University

Bangor, ME

- Contributed to a 100% pass rate among students in the course by providing targeted one-on-one and small-group tutoring sessions to reinforce complex concepts
- Facilitated technical discussions and clarified complex concepts during lectures and review sessions
- Graded assignments and provided structured feedback to improve students' problem-solving and analytical skills.

Student Assistant - Library

May 2025 – Aug 2025

Husson University

Bangor, ME

- Developed a full-stack application to analyze library circulation data and justify book weeding decisions, enabling data-driven collection management
- Processed and visualized usage statistics to identify underutilized books, supporting the removal of large volumes of low-demand materials.
- Reduced institutional costs by \$12,439 annually by analyzing database usage data and identifying redundant academic subscriptions.

PROJECTS

Study Buddy | *HTML, CSS, JavaScript, Anthropic API, Python, Flask, React, PostgreSQL, Docker* Jan 2026 – Present

- Developed a full-stack study partner matching platform to address the challenge of students struggling to find compatible study partners in large courses
- Designed and implemented the backend matching logic to pair students based on course enrollment, availability, and study preferences
- Built an interactive frontend interface that allowed users to create profiles, filter potential study partners, and schedule study sessions.
- Leveraging modern web technologies and database design to support the existing peer collaboration

TECHNICAL SKILLS

Languages: Java, Python, C/C++, C, SQL (Postgres), JavaScript, HTML/CSS, R,

Frameworks: React, Node.js, Flask, WordPress, FastAPI

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib
