+1 (207) 300-3684 | omishimwe@wpi.edu | [LinkedIn](#) | github.com/SVNGWA-O | svngwa-o.github.io

EDUCATION

Worcester Polytechnic Institute (WPI)

Bachelor of Science in Computer Science

Worcester, MA

Jan. 2024 – May 2027

Master of Science in Artificial Intelligence

Expected Aug. 2027 – May 2028

- **Relevant Coursework:** Data Structures & Algorithms, OOP, Operating Systems, Databases, AI & ML, Cybersecurity, Functional Programming

TECHNICAL SKILLS

Languages: Java, Python, C++, C#, JavaScript, TypeScript, SQL, HTML/CSS, Kotlin, Swift

AI / GenAI: Generative AI, RAG, Prompt Engineering, AI Agents, AI Security

Backend & Web: Spring Boot, FastAPI, Flask, Node.js, React, REST APIs, Microservices

Cloud & DevOps: Google Cloud Platform (GCP), Docker, Git, Jenkins, PostgreSQL, Supabase

Practices: System Design, Access Control, Authorization, Audit Logging, Secure Coding, Testing, Agile

PROJECTS

eNotaryRW | *Founder & Lead Engineer* | *Java, Spring Boot, React, Python* | enotaryrw.com Jan. 2026 – Present

- Founded a digital notarization platform for Rwanda, cutting notarization turnaround from hours to minutes
- Built a **Spring Boot** backend and **React** frontend for secure, real-time, end-to-end traceable document workflows
- Engineered a low-latency **Python** service matching clients to notaries by availability and document type
- Designed secure upload and signing workflows with **tamper-evident audit trails** for data integrity

AgentPerimeter | *Lead Engineer* | *AI Security, Authorization, Policy Enforcement* May 2026 – Present

- Building an **AI-agent security gateway** enforcing scoped, least-privilege access to sensitive data and tools
- Designing **audit logging**, behavioral monitoring, and policy-based detection of data exfiltration

eMed | *Founder & Lead Engineer* | *Python, FastAPI, PostgreSQL, Docker, GCP, TypeScript* Jan. 2026 – Present

- Founded a healthcare-access platform connecting patients with physicians for on-demand virtual consultations
- Designed **FastAPI** REST services on **PostgreSQL**, containerized with **Docker** and deployed to **GCP**
- Built native iOS, Android, and web clients from a shared **TypeScript** codebase using **Capacitor**

Smart MEP | *Lead Software Engineer* | *Design Automation, Multi-language Stack* Jan. 2026 – Present

- Lead engineering for a platform automating mechanical, electrical, and plumbing design for construction projects
- Built logic that generates and validates layouts against design rules, reducing manual drafting and errors

EXPERIENCE

Dell Technologies Aug. 2026 – Present

STEM Aspire Program

Hopkinton, MA

- Selected as **1 of 38 students** for a competitive four-month technology development program
- Receive mentorship and career coaching from Dell technologists through workshops and hands-on development

Worcester Polytechnic Institute Aug. 2026 – Present

Peer Learning Assistant, Computer Science

Worcester, MA

- Lead weekly CS lab sessions in **Python**, VS Code, and **Git**, reinforcing programming and debugging concepts
- Grade programming assignments and give targeted technical feedback to strengthen students' skills

Worcester Polytechnic Institute Aug. 2026 – Present

Office of Technology Innovation & Entrepreneurship Intern

Worcester, MA

- Maintain and monitor the office's internal database and information workflows for accurate, reliable records

Husson University Sep. 2025 – Dec. 2025

Teaching Assistant

Bangor, ME

- Taught data structures and algorithms one-on-one and in small groups, contributing to a **100% course pass rate**
- Used IntelliJ and Node.js examples to explain complex programming concepts
